EDUCATION

Kennesaw State University | Kennesaw, GA

May 2025

B.S. in Computer Science, | GPA: 3.2

- **Courses:** Files and Databases, Modern Web Development, Mobile Operating Systems, Computer Organization, Data Structures, Algorithms & Analysis, Foundations of Programming

General Assembly Software Engineering Bootcamp | Remote

Aug 2023

Comprehensive full-stack software engineering program covering JavaScript, React, Node.js, databases, APIs, and Agile development for industry-ready web application deployment.

TECHNICAL SKILLS

TypeScript, JavaScript (ES6+), React.js, Next.js, Node.js, Tailwind CSS, Git, Docker, Vercel, AWS (S3), Jest, Cypress, Figma, Core Web Vitals, Accessibility (WCAG 2.2), SEO Optimization.

RELEVANT EXPERIENCE

Council of State and Territorial Epidemiologists (CSTE) | Atlanta, GA

Aug. 2023 - Present

Software Engineer

- Engineered high-performance React.js and Next.js applications for CDC public health dashboards, reducing page load time by 40% through optimized API calls and client-side caching.
- designed interactive visualization tools that enabled non-technical CDC analysts to interpret complex epidemiological data more efficiently.
- Collaborated with CDC stakeholders to translate complex data sets into interactive, user-friendly visualization tools.
- Integrated analytics (Google Analytics 4, Hotjar) to track user engagement and inform data-driven UX improvements.

Verizon | Basking Ridge, NJ

May 2024 - Aug. 2024

Front-End Developer

- Delivered production-ready React components for an AI-powered customer service chatbot, improving self-service issues
- Validated front-end and API integration across sprints to ensure stable, responsive user interactions and error-free data flow.
- Collaborated with QA and product teams to triage defects, refine sprint goals, and accelerate deployment readiness.
- Evaluated chatbot telemetry to refine intent recognition and drive continuous model retraining improvements.

PROJECTS

GPC/NAPA | [AI StudyMate](#) | [Full-Stack Web App](#)

Sep. 2023

Tech: React, Tailwind CSS, Node.js, Express, OpenAI API, Firebase, Chart.js database retrieval using Firebase, and

- Built an AI-driven study assistant that transforms uploaded notes into flashcards, quizzes, and summaries using GPT API.
- Designed a Node.js + Express backend with Firebase authentication, ensuring secure personalized study sessions and 100% uptime post-deployment.

- Deployed a Node.js + Express backend with Firebase authentication and data persistence to enable secure, personalized study sessions.
